

CITY OF LODI

COUNCIL COMMUNICATION

AGENDA TITLE: Adopt Resolution Approving Plans and Specifications and Authorizing Advertisement for Bids for Traffic Signal and Street Lighting Improvements at Century Boulevard and Ham Lane and Authorizing the City Manager to Award the Contract and Appropriate Funds (\$185,000)

MEETING DATE: February 5, 2003

PREPARED BY: Public Works Director

RECOMMENDED ACTION: That the City Council adopt a resolution approving the plans and specifications for the above project, authorizing advertising for bids, and authorizing the City Manager to award the contract and appropriate funds.

BACKGROUND INFORMATION: The project includes installing a traffic signal and street lighting at the Century Boulevard and Ham Lane intersection. On July 19, 2000, City Council approved the City's Signal Priority Study. This intersection is one of the fourteen intersections on the Signal Priority Study List. The list and current status of each intersection is shown on Exhibit A. (Note that the score ranking is based on a previously-approved, arbitrary method and is for comparison purposes only. Based on funding opportunities, adjacent development and Council preference, actual construction sequence may change.) At its February 7, 2001, meeting, Council authorized the City Manager to execute a professional services agreement with Y & C Transportation Consultants, Inc., to design this project. In 2001, the plans and specifications for the traffic signal design were essentially ready for Council's approval, however, funding was not available at that time.

The specifications require that construction work be performed to minimize the disruption to high school pedestrian and vehicle traffic. The contractor will be required to perform sidewalk work during off-peak hours (when students are not going to and from school) and some roadway work during the high school's summer break.

Staff's request is for City Council to authorize the City Manager to award the project up to \$185,000. Based on actual bids, if additional funds are needed, this item will be brought back to City Council for approval to award and appropriate funds. The plans and specifications are on file in the Public Works Department.

FUNDING: The project estimate is \$185,000 and includes project construction and contingency costs. The funding source is Transportation Development Act funds (50%) and Local Streets Impact Fees (50%).
